

# OSAKHOGBA AKHATOR

[GitHub Profile](#) | [Portfolio Website](#)

## Profile Summary

---

As a BSc Computer Science graduate, I have harnessed my academic foundation to carve a niche as an engaging Frontend Web Developer. My skill sets include JavaScript, TailwindCSS, ReactJs, Supabase, Redux Toolkit, and React Query which are elements I use to build not just websites, but experiences. I am all about creating dynamic, responsive interfaces that captivate users while delivering top-notch performance.

## Projects

---

### Soozeer — ReactJs(<https://soozeer.netlify.app/>)

- Developed a social media platform for sharing ideas and thoughts.
- Utilized HTML, CSS, JavaScript, TailwindCSS, and ReactJs for the frontend development.
- Managed state with Redux Toolkit and enhanced data operations with React Query for fetching, caching, and state updates.
- Integrated Supabase for comprehensive backend services including authentication, database management, and storage.

### Noet — ReactJs(<https://noet.netlify.app/>)

- Designed a web application for note-taking and data storage.
- Implemented user data handling for fetching, storage, and manipulation.
- Frontend constructed using HTML, CSS, JavaScript, Framer Motion, ReactJs, and Tailwind CSS.
- Employed Supabase for secure data storage and user authentication.

### Lokateur — ReactJs(<https://lokateur.netlify.app/>)

- Innovated a geolocation simulation tool that converts IP addresses into detailed location data, including time zones and currencies.
- Developed a backend-agnostic frontend by implementing efficient API calls to fetch and process generic user location data.
- Constructed the application using HTML, CSS, JavaScript, ReactJs for stateful component management, and Tailwind CSS for a sleek, responsive design.

## Professional Experience

---

### National Nigerian Petroleum Corporation, Abuja — Web developer Intern

MARCH 2017 - DECEMBER 2017

- Engineered a comprehensive Fullstack Attendance Register web app for over 50 interns, using HTML and CSS on the front end and PHP with MySQL for the back end. This made keeping track of attendance a breeze, cutting down on administrative work and ensuring we had spot-on records for evaluations and payroll.
- Developed and deployed a secure Laptop Check In/Check Out system for the interns. This web app tightened up security in the office by tracking laptop usage, which meant fewer lost or misused laptops and better overall asset management.

## Fountain University, Osogbo — *Administrative Assistant*

NOVEMBER 2021 - NOVEMBER 2022

- Utilized Microsoft Excel to manage student data, keeping all the records up to date and organized, much like managing a database in computer science.
- Took on responsibilities similar to system administration by ensuring the smooth operational flow of the department in the absence of senior management, demonstrating an understanding of system maintenance and continuity planning.
- Drafted and shared official memos, making use of my skills in clear and organized communication, much like how important good documentation is in software engineering.

## Skills

---

- **Frontend Stack:** HTML5, CSS3, Bootstrap, TailwindCSS, JavaScript, Redux Toolkit, TanStack Query, ReactJS, Framer-motion.
- **Backend Stack:** SQL, PostgreSQL, Supabase, Firebase.
- **Version Control:** Git, GitHub

## Education

---

- **Ambrose Alli University, Nigeria — B.Sc**  
GRADUATED - MARCH 2020

## Certifications

---

- **Honours Bachelor of Science in Computer Science**  
AMBROSE ALLI UNIVERSITY, NIGERIA
- **Frontend Developer(React)**  
HACKERRANK

## Languages

---

- English
